

Terms and Conditions — “Losable Bonus” Campaign

1. Introduction

These Terms and Conditions (“Terms”) apply to the “losable Bonus” campaign (“Campaign”) offered by Xellion (“we”, “us”, “our”) to our clients (“you”). By participating in the Campaign, you agree to be bound by these Terms.

2. Eligibility

To be eligible for the Campaign, you must:

- Be a registered client of Xellion with an active trading account on the MT5 platform.
- Make an initial deposit qualifying for the Bonus.
- Accept these Terms during the Campaign period.

3. Campaign Period

The Bonus is active for one (1) calendar month (30 days) from the date of activation (i.e., the date of the initial qualifying deposit). Xellion reserves the right to extend, shorten, or terminate the Campaign at its sole discretion.

4. Bonus Offer

- The Bonus is credited to your MT5 trading account and can be used solely for trading purposes.
- The Bonus amount is calculated as up to 15% of the qualifying deposit, subject to a maximum of USD 200 per client/account.
- The Bonus is added to the account as Credit. It forms part of the account’s Equity and Margin Level, but does not form part of the account Balance and is not withdrawable as such.
- The Bonus can be granted only once per client/account and is tied to a single qualifying deposit. Bonuses do not accumulate: if a client makes an additional deposit while a Bonus is already active, the existing Bonus (and any Trading Volume Requirement accrued toward it) is cancelled, and a new Bonus is calculated solely on the basis of the new deposit, subject to the same 15% / USD 200 cap.
- The Bonus is a “Losable Bonus” — it is not a guaranteed credit and may be reduced or fully lost as a result of trading activity, in accordance with these Terms.

5. Bonus Conditions

- The Bonus cannot be withdrawn and may be lost during trading activity.

The Bonus will be automatically removed in the following cases:

- At the end of the 30-day validity period.
- If the account reaches the Stop Out level.
- Upon any withdrawal request.
- When transferring funds between accounts.
- If the Bonus is misused in any way that threatens Xellion, its systems, or is in violation of the trading rules, including illegal transactions. In such cases, the Bonus may be removed without prior notice.

- Upon removal of the Bonus for any reason under these Terms, Xellion will adjust the account's Equity accordingly. Such adjustment may cause the account to reach Stop Out level, resulting in the liquidation of open positions.

6. Anti-Abuse, Hedging and Arbitrage Restrictions

The Bonus is granted exclusively to support genuine, good-faith trading activity and is not intended to generate risk-free profit through arbitrage. The following practices are strictly prohibited and constitute Bonus misuse:

- Cross-account or cross-broker hedging: opening a position on an account funded (in whole or in part) by the Bonus, while holding or opening an opposite or correlated position of comparable size on another account — whether held with Xellion, an affiliated entity, or any other broker or liquidity provider — where the purpose or effect is to neutralize market risk and lock in the Bonus (or profit generated from it) as risk-free gain.
- Opening correlated or opposite positions across two or more accounts held by the same client, related clients, or accounts otherwise identified as connected (including by IP address, device, payment method, KYC data, or trading pattern) for the same purpose described above.
- Opening or holding positions in instruments that are highly correlated with each other (including, without limitation, gold and silver, currency pairs sharing a common leg, or correlated crude oil benchmarks), whether on one account or across connected accounts, where the purpose or effect is equivalent to the hedging described above.
- Engaging in latency arbitrage, statistical arbitrage, or any strategy exploiting pricing or execution delays, whether alone or in coordination with third parties.
- Opening positions funded by the Bonus in the period immediately surrounding scheduled high-impact economic releases (including, without limitation, central bank interest rate decisions and non-farm payrolls) in a manner designed to exploit pricing gaps or execution delays rather than to reflect a genuine market view.
- Using an Expert Advisor (EA) or other automated trading system on an account funded by the Bonus without prior disclosure to and approval from Xellion, where the system is designed to exploit, or has the effect of exploiting, any practice prohibited under this Section 6.
- Opening positions with minimal market exposure or negligible risk primarily or solely to generate volume, rebates, or unlock Bonus funds or profit.
- Any coordinated activity between multiple accounts or clients designed to guarantee profit from the Bonus regardless of market outcome.
- Using a VPN, proxy, or other means to misrepresent the client's true location, device, or identity in connection with the Campaign.

6.1 Connected Accounts

For the purposes of this Section 6, "connected accounts" means any accounts that Xellion reasonably believes are linked to the same individual, or to a group of individuals acting in concert, based on any available indicator, including but not limited to: shared or similar personal or KYC data; IP address; device or browser identifiers; payment instruments, e-wallets, or banking details; physical address or contact details; referral or Introducing Broker relationships; and trading patterns, including correlated entries or exits, mirrored volumes, or opposite positioning across accounts. This list is illustrative and not exhaustive, and Xellion may rely on any other reasonable indicator of connection.

6.2 Pre-Approval and Ongoing Verification

Xellion may withhold the granting of the Bonus, or suspend an already-granted Bonus pending review, where the account or deposit shows characteristics that Xellion reasonably considers unusual or high-risk, including but not limited to: a newly opened account with no prior trading history, a deposit inconsistent with the client's

declared profile, or the presence of any connection indicator described in Section 6.1. Xellion may require additional identity, source-of-funds, or source-of-wealth verification before releasing a withheld Bonus or any associated profit.

6.3 Trading Volume Requirement

Withdrawal of profit generated in connection with the Bonus is subject to the account having met all of the following conditions during the Campaign Period:

- Volume threshold: a minimum of 1 standard lot traded for every USD 100 of Bonus granted.
- Transaction count threshold: a minimum of 1 closed transaction for every USD 10 of Bonus granted.
- Minimum trade duration: each transaction counted toward the above thresholds must remain open for at least 3 minutes. Transactions closed sooner will not be counted toward either threshold.

6.4 Payout Calculation Where Requirements Are Not Met or Misuse Is Suspected

Where, at the time a withdrawal is requested, (a) the Required Volume under Section 6.3 has not been met, or (b) Xellion has reasonable grounds to suspect that the account has been used in breach of this Section 6, Xellion will review the account and calculate the amount payable to the client as follows: the account's Balance (Deposit plus realized Profit, excluding Credit) is reduced by an amount equal to the Bonus granted (the "Adjusted Amount"). Xellion does not guarantee the return of the original deposit in these circumstances — the client bears the trading result of the account, subject only to the deduction described above. Where the Adjusted Amount is zero or negative, no amount is payable.

- This clause is applied only where Xellion undertakes a review of the account, whether prompted by a withdrawal request, a failure to meet the Required Volume, suspected misuse, or otherwise. Xellion does not proactively audit or verify Section 6 compliance on accounts that show a trading loss and where no withdrawal is requested and no misuse is otherwise identified; such accounts are simply subject to the ordinary Bonus removal and Stop Out provisions of Section 5.
- This clause does not apply where a breach is confirmed under Section 7 (Fraudulent or Abusive Conduct); Section 7 applies instead and prevails.
- In all cases, the Bonus itself is removed regardless of the payout outcome, and any approved payment is made exclusively from the account's real Balance, excluding Credit.

6.5 Maximum Position Exposure

While the Bonus remains active and forms part of the account's Equity, the margin used by open positions in any single instrument (or in a group of correlated instruments under Section 6) may not exceed 50% of the account's available margin at the time of opening. The client may not commit substantially all available margin to a single instrument or correlated group. Xellion may reduce, close, or exclude from the Trading Volume Requirement any position exceeding this limit, at its discretion.

6.6 Enforcement

Where Xellion identifies, at its reasonable discretion, that any of the practices described in Section 6 have occurred, Xellion reserves the right, without prior notice, to:

- Void the Bonus and any profit generated in connection with such practices;
- Adjust, reverse, or cancel the trades associated with such practices;
- Suspend or close the trading account(s) involved pending review;
- Withhold payouts pending investigation;
- Apply Section 6.4 to determine the amount, if any, payable to the client.

Clawback: where a breach of Section 6 or Section 7 is identified within 60 days following any payout to the client — whether through Xellion's own review or through information received from a third party, including

another broker, payment provider, or anti-fraud database — Xellion reserves the right to reclaim the amount overpaid, whether by deduction from any account held by the client with Xellion or by direct written request for repayment.

Automated Detection: Xellion may use automated monitoring systems and risk models to identify patterns of conduct prohibited under this Section 6. A determination made in whole or in part on the output of such systems is a valid basis for action under this Section.

Information Sharing: Xellion may share information regarding confirmed or suspected misuse of the Bonus, including account and client identification details, with other brokers, payment providers, and industry anti-fraud databases or associations, for the purpose of fraud prevention.

6.7 Finality of Decisions

Decisions made by Xellion under this Section 6 and under Section 7 are final. A client who disagrees with a decision may submit a written complaint in accordance with Xellion's standard complaints procedure, but such a complaint does not suspend the effect of the decision pending its outcome.

7. Fraudulent or Abusive Conduct

Where Xellion determines, based on reasonable evidence, that a client has obtained the Bonus or related profit through misrepresentation, identity or payment misuse, chargeback abuse, or other conduct in breach of these Terms or applicable law, the following applies:

- All profit generated on the account in connection with such conduct will be forfeited.
- Xellion will return the client's originally deposited funds, less a 10% processing fee.
- The Bonus itself will be forfeited in full.
- The client will be liable for the full amount of any chargeback, reversal, or payment dispute raised in connection with a fraudulent or abusive deposit, together with any processing or administrative costs incurred by Xellion as a result, in addition to the consequences set out above.
- Xellion reserves the right to notify relevant payment providers and, where legally required, competent authorities.

8. Profits and Withdrawals

- Profits generated from trading with the Bonus are withdrawable, subject to Section 6.3, Section 6.4, and Xellion's standard withdrawal rules and procedures.
- Any withdrawal from the account will result in the removal of the Bonus.

9. Restrictions

- The Bonus is non-transferable between accounts.
- Each client may participate in the Campaign only once.
- Clients may not register, fund, or trade on an account referred by themselves (self-referral), or through an Introducing Broker (IB) or affiliate arrangement they own, control, or otherwise benefit from, in order to obtain the Bonus or any associated commissions or rebates. Any Bonus obtained in violation of this clause will be void, and Section 6.6 (Enforcement) applies.

10. Amendments and Termination

Xellion reserves the right to change these Terms or terminate the Campaign at any time without prior notice. Any changes will be published on our website. Continued participation in the Campaign after changes are posted constitutes acceptance of the revised Terms.

11. Risk Disclaimer and Liability

Trading CFDs involves a high risk of loss and is not suitable for all investors. The Bonus is intended to support trading activity but does not eliminate trading risks. Xellion shall not be liable for losses resulting from market fluctuations or the removal of the Bonus in accordance with these Terms.

12. Governing Law

These Terms shall be governed by and construed in accordance with the laws of Saint Lucia, without regard to its conflict of law provisions.

13. Contact Information
